- Azure DevOps

PROFESSIONAL PROFILE

Senior Software Developer with 4 years of experience building scalable SaaS-based CRM platforms using modern web technologies. Skilled in multi-tenant architecture, tenant-based database schemas, backend development, and designing robust, maintainable systems. Experienced in delivering scalable solutions that support secure data isolation, performance, and business-driven requirements.

WORK EXPERIENCE

Front End Developer — **Dec 2022 - Aug 2025**

(SITH Infotech)

Senior SoftwareDeveloper — **Sept 2024 - Till Date**

(Growve Retail and Management Services Limited)

- Design, develop, and maintain a multi-tenant SaaS CRM platform using Next.js, TypeScript, Fastify, PostgreSQL, Tailwind CSS, and Docker.
- Develop responsive, reusable frontend components and scalable RESTful APIs to support CRM and logistics business workflows.
- Design and optimize PostgreSQL database schemas, queries, indexes, and transactions to ensure data integrity and application performance.
- Implement multi-tenancy architecture, role-based access control (RBAC), authentication, and authorization to ensure secure organization-level data isolation.
- Develop CRM modules, logistics workflows, dashboards, reports, and data management features, including search, filtering, and pagination.
- Containerize applications using Docker and collaborate with the development team on code reviews, branch management, pull requests, and code merging using Azure DevOps.
- Troubleshoot and resolve application issues across frontend, backend, and database layers while following coding standards, modular architecture, and software development best practices.
